Preface

The annual International Scientific Applied Conference "Problems of Emergency Situations" (PES) is organized by the National University of Civil Defence of Ukraine (Ukraine, Kharkiv). The representatives from the Odesa State Academy of Civil Engineering and Architecture (Ukraine, Odesa) were involved as partners in PES 2024.

More than 250 participants registered for this year's conference. Scientists from 11 countries took part in the meeting, including the Republic of Austria, Azerbaijanian Republic, Italy, Poland, Czech Republic, as well as the Swiss Confederation, the Kingdom of Spain, the United States of America, the United Kingdom of Great Britain and Northern Ireland, Ukraine, and Japan. More than 170 reports were submitted to the conference.

The purpose of the conference was to discuss issues related to the problems and prospects of introducing the latest developments and technologies aimed at preventing emergencies, minimizing their consequences in the field of civil defence, sharing experience and finding new facets of scientific cooperation, solving problems of recent emergencies that create a global threat to humanity.

Table of Contents

Preface

Chapter 1: Mechanics of Structures

| Effective Application of Numerical Approaches and Green Functions for the Process of Modelling Spheres | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| V. Pasternak, A. Ruban, O. Bilotil and D. Karpova | 3 |
| Use of the Boundary Element Method for Solving Problems of Predicting the Regularities of Formation of the Structure of Non-Isometric Components V. Pasternak, A. Ruban, O. Chernenko and O. Nadon | 15 |
| Special Features of Using Mathematical Modeling for the Study of Tetrahedral Elements V. Pasternak, A. Ruban, K. Pasynchuk and P. Polyanskyi | 27 |
| Justification of the Dynamics of Extra-Project Loads on Building Structures M. Nalysko, A. Makhinko, A. Sopilniak and Y. Cheberiachko | 39 |
| Chapter 2: Building Structures | |
| Deformability and Crack Resistance of Reinforced Concrete and Fiber-Reinforced Concrete Cross-Beam Systems | |
| M. Surianinov, I. Aksyonova, A. Perperi and Z. Holovata | 49 |
| Comparative Analysis of the Load-Bearing Capacity and Crack Resistance of Reinforced Concrete and Fiber-Reinforced Concrete Airfield Slabs I. Korneeva, A.I. Kostiuk, O. Posternak and M. Surianinov | 57 |
| Modeling of Building Structures Resistance to Collapse Failure from Explosive Impact M. Barabash, N. Kostyra and V. Maksymenko | 65 |
| Analytical Calculation of Beams on Winkler's Variable Elastic Foundation Y. Krutii, M. Surianinov, V. Vakulenko, M. Soroka and N. Vasilieva | 75 |
| Chapter 3: Research and Design of Machines and Equipment | |
| Ways to Reduce the Mass of Body Parts of Closed Gears I. Matsiuk, O. Tverdokhlib, D. Dovhal and B. Tsymbal | 83 |
| Investigation of Diffraction of Electromagnetic Microwaves on Explosive Materials A. Karpov, M. Kustov, O. Basmanov and O. Kulakov | 91 |
| Using of Hydrogen Sorbtion Storing Technology Based on Metal Hydrides for Cooling of High-Power Electric Generators with Steam Turbines | 102 |
| K. Umerenkova, O. Kondratenko, H. Koloskova, O. Lytvynenko and V. Borysenko | 103 |
| Mathematical Model of the Dynamics of Spherical Elements V. Pasternak, A. Ruban, O. Holii and S. Vavreniuk | 117 |
| Computer Modelling of the Process of Separation of Heterogeneous Elements (Spheres) V. Pasternak, A. Ruban, Y. Horbachenko and S. Vavreniuk | 127 |
| Chapter 4: Waste Recycling and Waste Management | |
| Multi-Criteria Analysis of Technology that Ensure Environmental Safety in Waste Incineration | |
| O. Krot, O. Pukhovoi, N. Kosenko and Y. Levashova | 139 |
| Development and Implementation of Environmentally Safe Biotechnologies for the Utilization of Aquatic Organisms Biomass | |
| S. Digtar, V. Nykyforov, M. Malovanyy, G. Krusir and S. Huhlych | 147 |

Keyword Index

| A | | Electric Generators | 103 |
|--------------------------------|------------|----------------------------------------|-------------|
| Airfield Slab | 57 | Electromagnetic Microwave | 91 |
| Alternative Motor Fuels | 103 | Element Dynamics | 3, 117, 127 |
| Analytical Method | 75 | Emergency Explosive Impact | 65 |
| Angles | 15 | Energy from Waste | 139 |
| Approximation | 27 | Environment Protection Technologies | 103 |
| _ | | Environmental Safety | 103 |
| В | | Equilibrium Equations | 27 |
| Beam | 75 | Errors | 27 |
| Bending Equation | 75 | Eutrophication | 147 |
| Bio-Conversion | 147 | Exact Solution | 75 |
| Bio-Fertilizer | 147 | Experiment | 49 |
| Biotechnology | 147 | Explosive Material | 91 |
| Blue-Green Algae | 147 | Extra-Project Load | 39 |
| Boundaries | 15 | | |
| Boundary Conditions | 117 | \mathbf{F} | |
| Boundary Element Method | 3, 15 | Fiber-Reinforced Concrete | 49, 57 |
| Building Structure | 39 | Finite Element Method | 3, 27, 65 |
| | | Flue Gas Treatment | 139 |
| C | | Force Redistribution | 65 |
| Calculation Method | 39 | | |
| Closed Mechanical Transmission | 83 | \mathbf{G} | |
| Collapse Failure | 65 | Gear Reducer | 83 |
| Component Simulation | 15 | Geometric Parameters | 27 |
| Constants | 15 | Green's Theory | 3 |
| Convergence of Methods | 27 | | J |
| Cooling | 103 | Н | |
| Correlation Dependencies | 127 | | |
| Crack Resistance | 57, 65 | Hydrogen | 103 |
| Critical Loads | 65 | _ | |
| Cross-Beam System | 49 | I | |
| | | Impact Dynamics | 39 |
| D | | Initial Data | 3 |
| Dielectric Loss Angle Tangent | 91 | Interconnections | 117 |
| Dielectric Permittivity | 91 | Iteration | 27 |
| Diffraction | 91 | | |
| Dioxins | 139 | ${f L}$ | |
| Discrete Element Method | 117 | Liapunov's Indices | 127 |
| Dynamics | 15 | LIRA-SAPR | 65 |
| _ <i>y</i> | 15 | Load-Bearing Capacity | 57 |
| E | | Loud Dearing Capacity | 31 |
| Elastic Foundation | 75 | M | |
| Electric Field | 91 | Magnetic Field | 91 |
| | <i>,</i> . | 11145110110 1 1014 | 71 |

| Metal Hydrides | 103 | | |
|-------------------------------------------|--------------------|----------------------------------|-----------|
| Methanogenesis | 147 | \mathbf{V} | |
| Modeling | 27 | Variable Coefficient of Subgrade | 75 |
| Modelling | 3, 15, 117, 127 | Resistance | 73 |
| Multi-Criteria Analysis | 139 | \mathbf{W} | |
| Municipal Solid Waste | 139 | Waste Incineration Plant | 120 |
| N | | Wave Length | 139 91 |
| Nonlinear Calculation | 65 | Wave Vector Winkler Hypothesis | 91 75 |
| P | | 31 | |
| Physical and Mechanical Parameters | 127 | | |
| Plastic Inserts | 83 | | |
| Plastic Joints | 65 | | |
| Point Vectors | 3 | | |
| Polycyclic Aromatic Hydrocarbons | 139 | | |
| Potential | 3, 15 | | |
| R | | | |
| Reciprocating Internal Combustion Engines | 103 | | |
| Reduction of Mass | 83 | | |
| Reflection Coefficient | 91 | | |
| S | | | |
| Separation | 127 | | |
| Shock Air Wave | 39 | | |
| Spheres | 117, 127 | | |
| Stability | 65 | | |
| Steam Turbines | 103 | | |
| Storing Technologies | 103 | | |
| Survivability | 65 | | |
| System | 127 | | |
